#### CAREER OBJECTIVE

- To excel in the field of Software Development by working in a Team Oriented and Challenging Environment as a developer.
- To aid professional growth while being resourceful, innovative, and flexible.

#### PROFESSIONAL SUMMARY

- 3.8 years of IT experience as a Full Stack developer
- Experienced in **.NET, ASP .NET**, Web API, Angular, SQL, AWS, DevOps CICD pipeline, Agile, **GenAI, Agentic AI, GitHub Copilot, Visual studio professional 2019/2022**, Visual Studio Code.
- Ability to take independent responsibilities as well as to contribute as a team member.

#### TECHNICAL SKILLS

- **Dot Net Core:** C#, .Net, ASP .NET, Microservices, Web API, Routing, Dependency Injection.
- **Angular-** Typescript, Directives, Data Bindings, Decorators, Routing
- **SQL Server** - DDL, DML, Joins, Sub-queries, Stored Procedures
- **Cloud Services** – Azure – Basics, AWS - EC2, S3 storage, IAM
- **Methods Worked:** Agile and Scrum methodologies.
- **Tools:** Visual Studio professional 2019/2022, Visual Studio code, DBeaver, Camunda BPMN, IntelliJ, MongoDB Atlas, Compass, Postman.
- **Others** – HTML, CSS, JavaScript, Git, Python

#### COGNIZANT EXPERIENCE

##### Project:

| Project Name: NPT 1.5 Remediation |                                                   |
|-----------------------------------|---------------------------------------------------|
| Client                            | AIG Japan Insurance                               |
| Role                              | Associate                                         |
| Organization                      | Cognizant Technology Solutions India pvt. Limited |
| Duration                          | August 2025 to till now                           |

### Project Description:

Remediated the AIG Japan RISA/WAATS application by migrating VB6 components to **.NET Framework 4.8** and deploying **ASP/.NET application** to AWS using newly designed TO-BE servers. Analyzed AS-IS architecture to define a scalable TO-BE setup, identified required AWS EC2 infrastructure, and implemented CI/CD pipelines along with monitoring and maintenance. Leveraged Sybase (SQL) for data management and **used GitHub Copilot - GENAI, Claude Sonnet 4.7 and OPUS** in VS Code, and Visual Studio 2019 to support code migration and validation, ensuring seamless functionality comparable to the AS-IS system.

### Responsibilities:

- Supported migration of RISA/WAATS Travel Insurance application from VB6 to .NET Framework 4.8.
- Analyzed AS-IS architecture and designed TO-BE architecture, including AWS EC2 server setup and client-driven enhancements.
- Developed and migrated application using .NET 4.8, Sybase (ASE 16.0) SQL, and GitHub Copilot.
- Managed CI/CD pipelines and ensured continuous monitoring and maintenance of code repositories.
- Deployed ASP.NET and .NET applications to AWS EC2, ensuring stable and seamless production performance.

### Project:

| Project Name: Optum He-OH Investment |                                                   |
|--------------------------------------|---------------------------------------------------|
| Client                               | Optum                                             |
| Role                                 | Programmer Analyst                                |
| Organization                         | Cognizant Technology Solutions India pvt. Limited |
| Duration                             | April 2024 to July 2025                           |

### Project Description:

This Optum Health care Portal project is all about creating, downloading and submit patients all mandatory documents and in Health Harness portal (LetterTestHarness) for user roles. It is used for knowing the details of patience and then only doctor can take treatment and storing purpose of the patient details, report submission and doctor prescription to the patient throughout online. Here I used the tools and technologies BPMN, Communda Modeler, Hasura, GraphQL, Java, Angular, Unit testing.

### Responsibilities:

- Supported client requirements by implementing enhancements in Angular using latest versions and completing assigned use cases.
- Designed, developed, and analyzed solutions following best practices.

- Developed backend functionalities using Java, BPMN, and GraphQL based on requirements.
- Collaborated with the team by sharing technical knowledge and assisting developers when needed.

| Project Name: Navi Health Care |                                                   |
|--------------------------------|---------------------------------------------------|
| Client                         | Navi Health                                       |
| Role                           | Programmer Analyst                                |
| Organization                   | Cognizant Technology Solutions India pvt. Limited |
| Duration                       | May 2023 to March 2024                            |

### Project Description:

This Navi Health care Portal project is all about creating an application for admin and user roles, I created microservices for that application for secure purpose like if any service crashed then no need to change entire code and functionalities but just we can make changes the microservices wherever blocked in functionality of each microservices. It is used for making the patient details, Report submission and doctor prescription to the patient throughout online.

### Responsibilities:

- Responsibilities supporting the team and they allocated some simple tasks to do some changes in the angular code. Completed use cases which were given by manager.
- Responsible to analyze, develop following best practices defined.
- Developing .Net, Angular codes, microservices and for storing data, used MongoDB as per the client requirement.
- Share technical knowledge with the team and actively help other developers wherever possible.

### CAREER HIGHLIGHT

- Completed Internship in Asp .Net Full Stack and Angular also created policy admin portal.
- Completed **GitHub Copilot certification in .Net, Prompt Engineering.**
- Udemy course completion of Microsoft Azure and completed the certification from Microsoft.
- I have also completed Salesforce course in admin and developer and earned trailmix badges.
- Completed Azure AZ 900 fundamentals and Azure AI 900 fundamentals certifications
